

## ENVIRONMENTAL POLICY STATEMENT

The Company realises that one of the keys to success is the development and implementation of a successful environmental policy which is essential to long term business viability.

The Managing Director and all employees of Chelburn Precision Limited are dedicated to preventing pollution through the Company's operating processes and waste disposal, and are actively seeking new and improved systems of operation that will leave the earth a clean, healthy and safe place to live.

We believe that all industry has a fundamental responsibility for the environment and through continual assessment of its working procedures Chelburn Precision Limited wish to play an active role in protecting the future generation's inheritance.

**The main elements of Chelburn Precision Limited's Environmental Policy are listed below:**

- To take all practical steps to monitor and control or eliminate possible pollution risks
- To monitor procedures as to their environmental effects on its employees, neighbours and customers, so far as is reasonably possible
- To comply with the requirements of the Environmental Protection Act 1990, and all other relevant legislation
- To adopt good environmental practices, especially in areas where regulations are inadequate
- To work with governmental agencies to resolve any identified environmental problem, and to communicate information on such problems openly to those likely to be affected by them
- To be aware of new developments in material and where practical adopt them in place of those generally thought to be harmful to the environment
- To encourage energy efficiency and the recycling and re-use of materials wherever practical
- To promote environmental awareness to all its employees

Neil Travis  
Managing Director
